

PROTEST

IN FRONT OF THE
HEADQUARTERS
OF STV GROUP
SUPPORTING
THE MASSACRE
(NOT ONLY) IN GAZA

As a part of the May **ACTION WEEK** we are calling for a protest on Monday May 20th, 2024 in front of the headquarters of **STV GROUP a.s.** in Prague. STV Group materially supports the Israeli army that is massacring the people of Gaza. It is part of a war machine that is a profitable business and at the same time it brings destruction, death, misery, famine...

We will not remain silent when we know that thousands of miles away people like us are being murdered. We call for solidarity with them and will work to ensure that the massacres cannot continue. At the same time, we clearly declare our refusal to support nationalist tendencies that do not benefit the impoverished people of Gaza, but above all those who rule and exploit them. Our solidarity is directed towards our class brothers and sisters in Gaza who are under attacks by the Israeli army and, at the same time, under daily attacks by Palestinian capitalists, repressive forces, bureaucrats and religious fundamentalists.

The exploited and oppressed in Gaza have no common interest with those who exploit them at home, just as it is not in the interest of the exploited and

oppressed in Israel that the bombing of Gaza continues. We are not calling for “national unity” or “national liberation struggle”, but rather for the dismantling of national unity, which always represents a false “unity” between the subjugated social class and the capitalist class that subjugates it.

The cracks in the nationalist construction help the exploited, regardless of national borders, to recognize their common interests and the need to unite against their exploiters in Gaza, Israel and all over the world. Let us together denounce the “external” aggression of the Israeli State, but also the “local” aggression that takes place under the Palestinian flag. Let’s take a stand against nationalism - Israeli, Palestinian or otherwise. Let’s disrupt the business of the STV Group, which is adding fuel to the heat of the ongoing conflict in Gaza, but also in other parts of the world.
